

Systems Administrator - German speaking

Full-time, Budapest

pidas + Budapest = WOW!

We are looking for an experienced and self-motivated individual with a completed education in IT and several years of professional experience as a systems administrator.

Skills

Your Responsibilities

- Manage and maintain our **Windows Server** and **Microsoft 365 infrastructures** (including Azure, Exchange, SharePoint, Teams, Defender, Intune)
- Showcase your expertise in **configuring** and **administering virtualization solutions**
- Monitor and optimize our **network infrastructure** (routers, switches, firewalls, VPNs)
- Implement **security policies** and ensure compliance
- Lead **IT projects** from planning through to implementation, adhering to time and budget constraints.
- Continuously support and develop our system landscape
- Collaborate closely with other teams to integrate IT systems into business processes and support IT-related requirements

Your Strengths

- Completed education in IT or equivalent qualifications
- **Several years** of professional **experience as a system administrator**
- Strong knowledge of network technology and experience with network components, protocols, and network security
- Comprehensive understanding of IT security concepts, tools, and compliance guidelines
- Team-oriented, independent, and structured work approach with strong problem-solving skills
- Good communication skills in **German (C1)** and the ability to convey complex technical concepts clearly
